

Habitat Connectivity

Essential habitat connectivity - based on connecting ecologically intact areas

Wildlife core areas and corridors - based on modeling:

- Tule elk
- Bobcat
- Giant garter snake
- Pronghorn
- Western yellow-billed cuckoo
- San Joaquin kit fox
- Swainson's hawk
- vernal pool complexes

Data sources: California Dept. of Fish & Wildlife and California Dept. of Transportation; U.C. Davis Information Center for the Environment; U.S. Fish & Wildlife Service (National Wetlands Inventory), 2015.

- Central Valley (buffered)
- County boundary
- Urban area
- Water

Essential Habitat Connectivity Project (State of CA):

- Essential habitat connectivity area

U.C. Davis, Information Center for the Environment Connectivity Analysis:

- Core wildlife area
- Wildlife corridor
